

Press Release

Date: April 25, 2006

Subject: New PDF Report format

After a trial period with several customers, Worksmart, Inc. is pleased to announce as of May 01, 2006 our well established and widely accepted phase two report format will now be published in Adobe Acrobat .PDF format and delivered directly to your e-mail, usually within twenty four hours of completion of the field radar scan. No more waiting on Fedex delivery!

This is not an abbreviated version or simple letter full of opinion. It gives all the detail, photographs and radar scan data of our paper bound version. The .PDF file may be printed complete with cover sheet and page dividers or specific sections to compliment your report.

The other benefit is we will no longer be charging an additional fee for multiple copies. Our .PDF report will be sent to as many e-mail accounts as you wish with no additional charge!

Please call us at 1-800-565-3347 with any comments or suggestions for future improvements to our superior subsurface imaging services.
